SUMMARY

Senior Frontend Engineer with 7+ years shipping production React/TypeScript systems in health-tech and fintech, preceded by 10 years as a UX/UI designer, so design judgment and engineering execution are one practice, not two skills. Builds the architecture, design systems, and component libraries behind products used by 50,000+ active users, and leads frontend teams on standards, testing, and accessibility (WCAG 2.1 AA). Focused on making complex, data-heavy workflows feel simple.

Core stack: React · TypeScript · TanStack · Tailwind CSS · shadcn/ui · Radix UI · Design Systems · D3 · WCAG 2.1 AA

EXPERIENCE

Senior Front End Developer — Gravie

Sept 2025 – Present · Remote

- Built the foundational frontend stack (React, TypeScript, TanStack Query, Zustand) from the ground up for a new multi-portal platform serving admins, members, and brokers.
- Led migration of a legacy ClojureScript/Grails codebase to a unified React/TypeScript architecture using Single-SPA microfrontends, replacing fragmented per-portal implementations with one shared architecture.
- Built and governed a shared component library and design system (Tailwind CSS, shadcn/ui, Radix UI) powering high-traffic employer and employee dashboards across ICHRA (individual coverage HRA) and level-funded product lines.
- Built core logic and member-facing UI for Plan Matching, a deterministic recommendation engine narrowing 150+ insurance plans to a personalized top 3, launched as a cross-functional pilot to reduce decision paralysis and support-call volume during open enrollment.
- Established frontend governance across all three portals: WCAG 2.1 AA standards, ESLint rules, code review practices, an AI-assisted merge request review tool built with Claude Code, and API data contracts with shared loading, error, and pagination patterns defined with backend leads.

Senior Front End Developer — Take Command

Jan 2024 – Sept 2025 · Remote

- Led a team of 4 engineers, owning technical direction, code review, and mentorship for employer onboarding and reimbursement systems.
- Drove frontend discovery in sprint planning with product, design, and backend leads, surfacing API feasibility and scalability risks early and reducing mid-sprint rework and scope changes.
- Built a domain-driven folder structure and shared hooks library and enforced ESLint standards org-wide, giving new engineers a documented pattern to onboard against.
- Drove adoption of frontend testing and quality practices across the team, reducing the rate of issues reaching production.

Frontend Developer — Take Command

June 2020 – Jan 2024 · Dallas, TX

- Identified fragmentation across 9+ pages and architected a shared DataGrid system (reusable filter drawers, persistent query-param state, CSV export) adopted product-wide, eliminating duplicate implementations.
- Integrated RESTful APIs (Django, Java) serving 50,000+ active users, owning data contracts, loading/error/empty states, and edge cases end-to-end.
- Delivered responsive, accessible (WCAG) ICHRA flows for employer onboarding, plan shopping, and reimbursement, including form-heavy, real-time-validated multi-step financial workflows.

Frontend Developer & Experience Lead — Havoc Shield

Mar 2020 – June 2020 · Remote

- Built responsive, cross-browser web pages with HTML, CSS, and JavaScript, using flexible grid layouts and media queries to support a growing mobile user base.
- Redesigned existing layouts to improve usability and performance, applying UX principles to identify and fix friction points.

Independent Web Developer 2015 – 2025 · Remote

- Designed and built custom WordPress and Squarespace websites for small businesses in media, technology, law, education, and interior design.
- Customized themes with HTML, CSS, and JavaScript, built responsive layouts, and set up SEO basics, analytics, and contact forms.
- Trained clients to update and manage their own content after launch.

DESIGN EXPERIENCE

Associate Founder, Head of Design Experience, Hu-manity.co — New York, NY · 2019 – 2020
Lead UI/UX Designer, Cadence — New York, NY · 2018 – 2019
UI/UX Designer, Apogy — New York, NY · 2014 – 2018
UX Designer, SciMedMedia — New York, NY · 2011 – 2013

SKILLS

Languages & Frameworks: React, TypeScript, JavaScript, Astro, Node.js, HTML5/CSS3
State & Data: TanStack Query & Table, Zustand, Redux Toolkit, Supabase (Postgres), RESTful API Integration
UI & Design Systems: Design Systems, Component Libraries, Tailwind CSS, shadcn/ui, Radix UI, Chakra UI, Mantine, Bootstrap, Figma, Sketch
Data Visualization: D3 (d3-geo), Recharts, Leaflet + OpenStreetMap, TopoJSON
Quality & Accessibility: WCAG 2.1 AA Accessibility, Playwright, ESLint, Code Review Standards
Practices & Tools: Single-SPA Microfrontends, GitHub Actions (CI/CD), Claude Code, LaunchDarkly, Fullstory, Agile/Scrum

EDUCATION & CERTIFICATIONS

B.S., Economics/Psychology — Baruch College, New York, NY (2013)
Certified Scrum Master (CSM)
AWS — Software Architecture: Domain-Driven Design
AWS — Developing on AWS
